

REMOTE ADR RIG

*Our Remote ADR Rig arrives at your doorstep...
The talent plugs in four cables and we take care of the rest.*

Record multiple actors remotely from the safety of their own homes with multiple microphone and equipment options from our own world class ADR stage.

The Remote ADR Rig can record sampling rates of up to 96k, which is the exact same quality found on high end ADR systems in studios all over the world.

With our Remote ADR Rig solution, there are no sonic compromises. Most remote systems incorporate USB microphones or iPhones to produce compromised recordings.

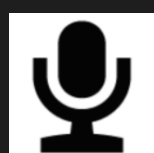

Rigs are ready to ship today to the comfort of your talent's home!

ADDITIONAL RIG DETAILS

The Remote ADR Solution provides an easy to use package that requires minimal connections, allowing almost anyone to set up an ADR session that can be run remotely by professional studio personnel wherever the talent might be.

The Remote ADR Solution comes self-contained in a case, with all of the equipment, cables and connections needed for the session. Many different models of microphones are available to be delivered for each session to match the needs of the production. The package comes sealed and sterilized before each session with easy-to-understand instructions to get the session going as efficiently as possible.

Available Microphones: Schoeps, Sanken, Neumann, Sennheiser, DPA, Mojave, dozens more... full list upon request.
